## NEW **"SURE-CUT"** DISK & FLAIL CUTTING & MULCHING SYSTEM

One of the major upgrades on the newly released Roto-Mulch S/P MkII was a completely new disk and flail mulching blade system. Field trials of this system have been impressive. So impressive in fact that we have decided to make it available as a retro-fit kit for the many lawn care contractors and discerning private owners of our professional Mulching mowers.

Utilizing our new patented heavy duty flail blade, this system not only produces a superb result, but it lasts longer which means you have less down time and your running costs are lower.

New heavy duty blade design

Patented reversible design of 2.5mm thickness hardened steel gives many times the usual blade life for reduced down time and lower running costs

### New Heavy Duty Flail Blades
