

Roto-Pro

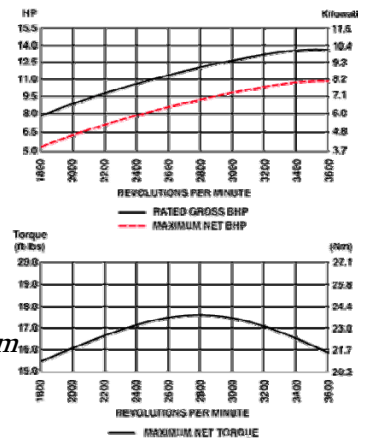

Application

The "Roto-Pro" is a unique mower designed specifically for the professional operating in the arduous conditions of New Zealand and the Pacific. The "Roto-Pro" features a wide cut high impact fabricated steel chassis, a powerful 13Hp engine, the "Easy-Steer" zero turn wheel system and is packed with convenient features that reduce down time and maximise performance. It is built to be robust and reliable for those who rely on it for a living and ensure they enjoy the lowest possible total cost of ownership. Ideal for lawn maintenance contractors, landscape companies, farmers, lifestyle block owners and discerning private owners who know they deserve the best. Perfect for big jobs all day long..... everyday.
